

INDEX

It requires a lot of time to make an index. Since I am still adding research, and genealogies, biographies and more history to this 20 volume work it will be awhile before I can do the index.

To make things worse I have several medical problems plus I am now a witness for homeland security against some low lifes working on taking over and killing our public officials and police in the process. Remember we are at war and have already lost thousands of our young people to them. They are recruiting in prisons and bringing in thousands of supporters from their countries. Unfortunately the American public is uninformed, unconcerned and seemingly uncaring. They have also threatened that I will have a fatal accident if I do not take down my history website. Well I am an old soldier am not going to cave in to these enemies who are practicing and planning stealth warfare here. To bad the public is clueless and believes their lies.

I say just look at their actions where they have taken power. America is outnumbered. Only our money and technology is keeping us safe but the government has blown our trillions and has been borrowing from China and now US taxpayers are financing the Chinese military. The Chinese have been stealing and back-engineering our technology and what they can't steal they are now buying the companies who have the technology. They are about to surpass us in many ways. They have more bright kids then we have kids and they are giving their kids free advanced education while many of our smart kids are still forced into making burgers. The Chinese and Saudies are buying large amounts of land in the USA and buying into newspapers and TV/radio stations with an eye on controlling the media. They who control information control the sheeple. Most Americans are TV addics, followers.

My goal in all of my work was simply to preserve our History and American way of life and present the facts to future generations so they can learn from it. I am also preserving the best music of the past and some beautiful scenes of America for all. Visit macombhistory.us and enjoy the flight over the Grand Canyon with beautiful music for example.

The table of contents and picture Index will help you find things until I can get the Index done.

Index to pictures used in the first 130 pages
